THE ASSOCIATION FOR EDUCATIONAL AND TRAINING TECHNOLOGY

The Association is an independent voluntary body devoted to the improvement of education and training through the systematic application of instructional technology. It provides a meeting point for discussion, a platform for the exchange of views and a means of communication between members working in, contributing to and servicing the whole spectrum of education and training.

By holding conferences and meetings, staging exhibitions, organising courses and through its network of advisory centres and its various publications, APLET gives its members information about developing trends and aims to further both the efficiency and the employment of educational technology.

Membership is open to all interested in current developments in education and training. The different classes of membership cater for the major sections.
